LIVE
QC

**Live!QC Tools** is a technology enabler for companies aspiring to build robust processes for sustained growth and profitability.

Built for effective deployment of the 7 QC Tools, Live!QC Tools is a truly collaborative tool for teams aiming to grow and expand into new markets, to share and put knowledge for reuse.

Unique Client-Server architecture of Live!QC Tools ensures that processes and data are visible to stake holders across the organization, thereby helping teams to contribute to each other's challenges while sharing their knowledge and experience.

7 QC Tools are used by Industries world-wide for implementing and analysing processes and are well known as problem solving tools.

Instead of relying on spreadsheets to collect and analyse data, users can leverage the power of Live!QC Tools to publish their data/ analysis for re-use by others, with records of observation, action taken as expected by ISO 9000 and other QMS Standards.
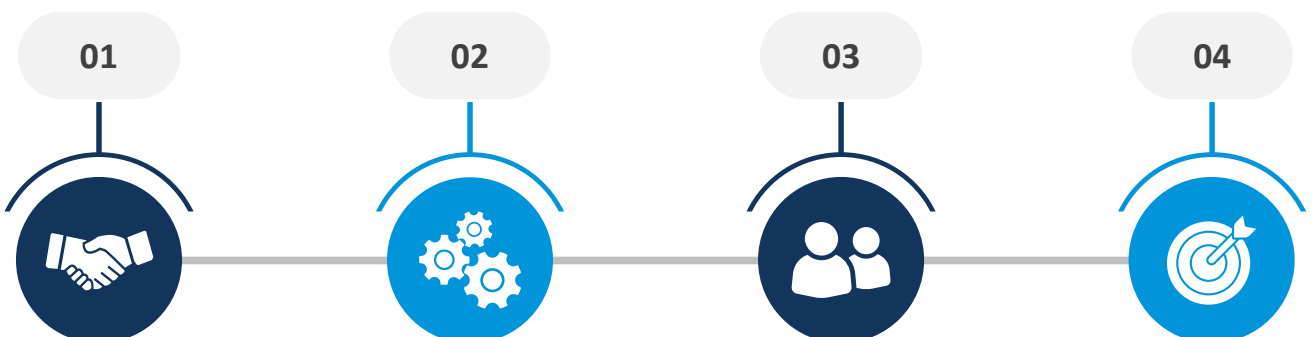

By serving as a central repository for data from multiple sources, Live!QC Tools enables stakeholders to interpret charts, generate reports, solve problems and improve processes to achieve desired results.

Updated information is instantly available for re-use without any delay.

## One Tool For All Departments

› Define Processes with Flowchart

› Identify influencing parameters with Fishbone and Scatter diagrams

› Measure Parameters with Check sheets
