

# Live!Audit

## Transform the Way You Perform Audits

Digitize audits. Track compliance. Improve operational quality.

### Smart Audit Planning

Plan and schedule internal, supplier, and process audits with ease. Create structured checklists, assign auditors, and ensure audits are conducted consistently across teams and departments.

### Digital Audit Execution

Conduct audits digitally Based on the standards and capture findings instantly. Record observations, attach evidence, and track non-conformities without paperwork.

### Action Tracking & Compliance

Convert audit findings into corrective actions and monitor progress in real time. Ensure accountability, track closure status, and maintain compliance across the organization.

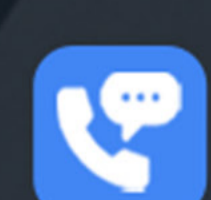

## About Our Company

Live!QC Tools is a next-generation Digital Quality Management Platform that connects shopfloor data, quality processes, and leadership insights in real time. It transforms fragmented quality data into actionable insights, helping organizations move from reactive defect control to proactive quality improvement and always-ready compliance.

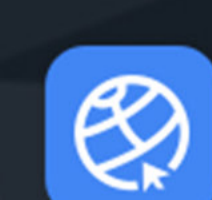

## Why Choose Live!Audit?

- Digitize and standardize audit processes
- Improve compliance and audit visibility
- Eliminate manual documentation and errors
- Track corrective actions efficiently
- Real-time dashboards and reports
- Delegate to stake holders for timely submission
